Special Issue

Emerging Topics in Freeform Optics

Message from the Guest Editors

Freeform optics is a rapidly evolving subfield of modern optics. It breaks the traditional limitations of spherical and aspherical surfaces, allowing for the creation of optical components with complex, non-rotationally symmetric shapes. This flexibility enables the development of optical systems with unprecedented performance, especially in terms of image quality, field of view, and aberration correction. The potential applications of freeform optics are vast and diverse. From consumer electronics such as smartphones and cameras, to scientific instruments like telescopes and microscopes, freeform optics is poised to transform the way we capture, process, and interpret optical information.

In this Special Issue on "Emerging Topics in Freeform Optics", we invite you to contribute your cutting-edge research in this exciting field. We are particularly interested in papers that address the following topics:

- Fundamental theories and principles of freeform optics.
- Advanced applications of freeform optics in various fields.
- Challenges and opportunities in the commercialization of freeform optics.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
