Special Issue

Advanced Fiber Laser Technology and Its Application

Message from the Guest Editors

This Special Issue welcomes manuscripts with originality that focus on the investigation and application of various kinds of optical fiber lasers. All manuscripts related to theoretical investigation, numerical simulation, and experimental exploration are welcome. Topics include, but are not limited to, the following:

- High-performance components that are of vital importance for optical fiber lasers;
- Optical fiber lasers operating at different wavebands, such as 1.0, 1.31, 1.55, 1.7, and 2.0;
- Optical fiber lasers with different operation modes, such as single-frequency, pulsed, high-power;
- Principle, method, and technology for improving the performance of optical fiber lasers;
- Engineering application technology for optical fiber lasers;
- Advances and reviews of optical fiber lasers;
- Intelligent equipment system related to optical fiber lasers;
- Application of optical fiber laser, such as industrial processing, laser medicine, and optical sensing.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu
School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
