

Special Issue

Optical Properties of Sol-Gel Derived Materials and Thin Film Structures

Message from the Guest Editors

Low-cost sol-gel technology receives significant attention for photonics applications. This special issue invites manuscripts that introduce the recent advances in sol-gel-derived optical materials and microstructures. Topics include, but are not limited to the following:

- Luminescence of lanthanides and transition metals from sol-gel-derived powders and thin films
- Materials and coatings with upconversion luminescence for solar cells
- Enhanced luminescence of lanthanides from microcavities: Stokes and anti-Stokes (upconversion luminescence)
- X-ray convertors and scintillators
- Photonic band gap materials and sol-gel derived materials in porous matrices.
- Optical filters
- Optical properties of conductive transparent coatings
- Sol-gel-derived planar waveguides
- Optical properties of sol-gel-derived glasses
- Porous materials for photocatalysis
- Optical sensors

Guest Editors

Prof. Dr. Nikolai Gaponenko

Prof. Dr. Raghavan Subasri

Prof. Dr. Wiesław Stręk

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu

School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
