## Advances in X-Ray Imaging Technology

### Message from the Guest Editor

X-ray coherent imaging technology, a state-of-the-art methodology, harnesses coherent X-ray beams in order to offer exceptional resolution and contrast, unveiling the intricate internal structures of samples with unparalleled detail. This cutting-edge technology is widely applicable in diverse fields such as materials science, biology, medical diagnostics, non-destructive testing, and more, catalyzing breakthroughs in research, science, and industry. This upcoming Special Issue delves into the forefront of X-ray coherent imaging, shedding light on pioneering developments and methodologies that are reshaping the field, and will serve as a platform for researchers and experts to share insights and discoveries. Potential topics include, but are not limited to, the following:

- Development of advanced X-ray sources for coherent imaging.
- Instrumentation development for efficient
- Novel techniques enhancing data acquisition and processing.
- Innovations in data analysis and image reconstruction.
- Multi-modal imaging approaches.
- Applications of X-ray coherent imaging techniques.
- Discussions on challenges and future directions.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q2 (Instrumentation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
