

Special Issue

Next-Generation Passive Optical Networks: Progress and Challenges

Message from the Guest Editors

This Special Issue of the *Photonics* journal covers a large scope of research in NG-PONs, concentrating on optical access networks and the convergence of integrated fiber and wireless access technologies, and solicits contributions in, but not limited to:

- Evolution, design, and performance evaluation of new standards for next-generation PONs;
- Future softwarization and virtualization of optical access networks;
- Dynamic bandwidth allocation (DBA), dynamic and wavelength bandwidth allocation (DWBA) algorithms, and multiple media access control (MAC) mechanisms;
- Optical metro edge and access aggregation convergence;
- Convergence of optical access and mobile broadband systems for new radio access networks;
- Use of AI/ML for improving performance in optical and radio access networks;
- Fiber-wireless integrated radio access network architecture design and system interface;
- PON architectures for low-latency and high-capacity mesh interconnect of edge nodes;
- Free-space optical communication, elastic optical networks, radio over fiber
- Low Latency Optical Network Systems & Techniques for 6G time-sensitive applications

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu

School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
