

Special Issue

Advanced Lasers and Their Applications, 2nd Edition

Message from the Guest Editors

Advanced lasers have revolutionized various fields, ranging from telecommunications to medical surgery, offering unparalleled precision, power, and versatility. These sophisticated devices generate intense beams of coherent light through stimulated emission, where atoms or molecules release photons in synchronization. One of the key advancements in laser technology is the development of various types of lasers tailored to specific applications. For instance, solid-state lasers, such as Nd:YAG or Ti:sapphire lasers, offer high energy and precise wavelength control, making them ideal for scientific research and medical procedures. Semiconductor lasers, commonly found in DVD players and laser pointers, boast compactness and efficiency, driving innovations in telecommunications and data storage. We are inviting both research articles and review papers that are related to this fascinating topic. Further information can be found on the Special Issue website. Research areas may include (but are not limited to) the following:

- Fiber lasers;
- All-solid-state lasers;
- Semiconductor lasers;
- Micro/nano-structure fabrication;
- Optical sensors.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu

School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
