

## Special Issue

# Laser Surface Processing: From Fundamentals to Applications

### Message from the Guest Editor

In today's evolving manufacturing landscape, achieving precise and reliable control over material properties is a top priority. Laser surface processing, an advanced class of techniques that harnesses high-intensity laser beams, has emerged as a powerful solution to meet this need. By focusing laser energy onto the surface of a material, engineers can induce rapid heating, melting, or even vaporization—leading to controlled changes in a material's microstructure and properties. Whether strengthening steel components or creating micro-textures for biomedical implants, laser surface processing is driving innovation across many industries.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q2 (Instrumentation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
