

Special Issue

Advances in Fiber Optical Sensing Technology for Harsh Environment Applications

Message from the Guest Editors

This Special Issue is dedicated to the recent developments in fiber optics sensing technologies, focusing on all aspects of the research and development of fiber optics sensors for applications in harsh environments. This Special Issue emphasizes research papers and reviews that focus on fiber optics metrology and new functional material interrogation for harsh environmental applications. I hope that this Special Issue will provide researchers in this field with a platform to publish their recent results as well as offer the research community a comprehensive overview of current progress in the field of optical fiber sensors for harsh environmental applications. Keywords:

- environmental and industrial monitoring sensors
- health monitoring sensors
- chemical sensors
- high-temperature sensors
- radiation sensors

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu

School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
