

Special Issue

Optical Metasurfaces: Recent Advances and Future Directions

Message from the Guest Editors

The current progress in tunable optical metasurfaces consists of metasurfaces based on active materials and metasurfaces based on nano-mechanical structural reconfiguration. Recent years have witnessed a growing research interest in the study of liquid crystals (LCs), phase-change, flexible materials, and microelectromechanical systems (MEMS). This Special Issue is expected to boost the development of new directions in the field of active materials and nano-mechanical structural reconfiguration to foreseen ground-breaking discoveries and provide novel avenues for important applications. The elements of tunable metasurfaces are spread across disciplines, and many of the recent ideas are based on the concepts of active materials and nano-mechanical structural reconfiguration. We expect that papers of this Special Issue will explore the innovation of materials, fabrication technology, and design and optimization methods, in order to provide an interdisciplinary platform for novel photonics applications.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu

School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
