

## Special Issue

# Advances in Optical Field Modulation Techniques and Applications

### Message from the Guest Editors

We are delighted to announce the call for papers for our forthcoming Special Issue of *Photonics*, “Advances in Optical Field Modulation Techniques and Applications”. Structured light, with its multiple dimensions and degrees of freedom, has proven to be a potent tool in various applications, opening up vast possibilities for innovation and applications. Optical coherence and polarization manipulation are at the forefront of research in optics, offering extensive capabilities in multi-dimensional information encoding, transfer, storage, and communications. This Special Issue will discuss the latest advances in coherence and polarization manipulating, measurement, propagation, and applications, and the subsequent development of new light-field manipulation principles and effective solutions to address various challenges in practical applications for partially coherent beams and polarization beams. We invite researchers, academics, and industry professionals to contribute their insights and findings to this Special Issue, fostering collaboration and knowledge exchange in this exciting area of study. Looking forward to receiving your contributions.

### Guest Editors

Dr. Yonglei Liu

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

---

### Editor-in-Chief

Prof. Dr. Nelson Tansu

School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q2 (Instrumentation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
