

## Special Issue

# The Development and Future Prospect of Microwave Photonics

### Message from the Guest Editors

Microwave photonics (MWP) combines the worlds of microwave and photonics to generate, transmit, control, process, and measure microwave signals using photonic devices, systems, and technologies with advantages such as broadband, ground transmission loss, and electromagnetic interference resistance. The continuous growth of MWPs has driven innovative developments in 5/6G communications, deep space exploration, radar imaging, big data computing, and more. This Special Issue invites manuscripts that introduce the development and prospects of microwave photonics. All theoretical, numerical, and experimental papers are welcome. Topics include, but are not limited to, the following:

- The photonic generation of microwave/millimeter-wave/terahertz signals;
- RoF for B5G/6G data and communication systems;
- The photonic processing of microwave/millimeter-wave/terahertz signals;
- The photonic sensing and measurement of microwave/millimeter-wave/terahertz signals;
- Integrated microwave photonics;
- Quantum microwave photonics;
- Intelligent computational microwave photonics;
- AI microwave photonics;
- Microwave photonic radars;
- Novel device technologies for microwave photonics.

### Guest Editors

Dr. Zhiqiang Fan

School of Optoelectronic Science and Engineering, University of Electronic Science and Technology of China, Chengdu, China

Dr. Bin Wang

Beijing Institute of Technology, Beijing, China

### Deadline for manuscript submissions

closed (10 February 2024)

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

---

### Editor-in-Chief

Prof. Dr. Nelson Tansu

School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Optics)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).
