

## Special Issue

# Quantum Dot Light-Emitting Diodes: Innovations and Applications

### Message from the Guest Editors

Quantum dot light-emitting diodes (QD-LEDs) are one of the most promising self-luminous displays in terms of luminous efficiency, wavelength tunability and cost. Future applications using QD-LEDs range from wide color gamut and large screen displays to augmented/virtual reality displays, wearable/flexible displays, in-vehicle displays and transparent displays, which require high performance in terms of contrast, viewing angle, response time and power consumption. The theoretical efficiency of a single component is achieved by customizing the QD structure and optimizing the charge balance in the charge transport layer to improve efficiency and lifetime. The maximum external quantum efficiency and lifetime of QD-LEDs have now taken a quantum leap and are increasingly eligible for commercialization. However, many challenges remain for the key factors determining the performance of QD-LEDs, such as the emitter, hole/electron transport layer and device structure. This Special Issue invites contributions describing the latest advances in quantum dot light-emitting diodes. All theoretical, numerical and experimental papers are accepted.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q2 (Instrumentation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
