# Metamaterials, Photonic Crystals and Plasmonics - Selected papers from META 2019

### Message from the Guest Editor

META 2019, the 10th International Conference on Metamaterials, Photonic Crystals and Plasmonics will take place in Instituto Superior Técnico, Lisbon, Portugal, from July 23, 2019 to July 26, 2019. The program will facilitate discussions on various current hot topics such as metasurfaces & metadevices, topological effects in optics, two-dimensional materials, light-matter interaction in nanocavities, plasmonic circuits, thermal engineering, quantum photonic systems, etc. This Special Issue will contain a selection of papers submitted and accepted at META 2019. Its main scope is to provide a timely and broad collection of the most innovative topics discussed at the latest edition of the congress related to nanophotonics and metamaterials.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.
