Special Issue

Vertical-Cavity Surface-Emitting Laser Technology: Innovations and Future Trends

Message from the Guest Editor

Vertical-Cavity Surface-Emitting Laser (VCSEL) technology has emerged as a crucial component in modern optoelectronics, driving innovations across various applications from data communication to sensing and imaging systems. This Special Issue aims to focus on the latest advancements and future trends in VCSEL technology, encompassing the development of novel materials, innovative design approaches, and enhanced fabrication techniques. Additionally, we also aim to explore the integration of VCSELs in photonic neural networks, underscoring their potential in nextgeneration computing and artificial intelligence applications. We set out to gather cutting-edge research that highlights the potential of VCSELs to revolutionize industries through improved performance, efficiency, and versatility. We seek contributions that explore theoretical studies, experimental investigations, and practical implementations, providing a comprehensive overview of the current state and future directions of VCSEL technology.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
