Special Issue

Enhanced Sensing Performance in Optical Fibers

Message from the Guest Editors

Fiber-optic sensors offer several advantages, such as their small size, resistance to electromagnetic interference, and remote and distributed measurement, making them widely applicable in various fields. The rapid evolution of fiber sensing techniques, fiber manufacturing, optical networks, and data processing has provided an opportunity for collaborative efforts across diverse multidisciplinary fields. This Special Issue aims to present sensing performance-enhanced fiber-optic sensors in terms of both their fundamental research and field applications. Topics include but are not restricted to:

- Novel mechanisms and technologies in fiber-optic sensing;
- Novel mirco and nanostructured fiber devices for sensing applications;
- High-performance distributed fiber-optic sensors based on Rayleigh, Brillouin, and Raman scattering;
- Fiber Bragg grating-based quasi-distributed sensors;
- Data-driven artificial intelligence-enabled data processing methods for fiber-optic sensors;
- Optic-electronic detection techniques for fiber-optic sensors;
- Applications of performance-enhanced fiber-optic sensors in optical communication networks

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.8 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
