

Special Issue

Advances of Laser Diode and LED

Message from the Guest Editor

Semiconductor lasers and light emitting diodes (LEDs) have been rapidly developed for the past decades attributed to the dedication and passion of scientists and engineers, as well as the strong need of achieving high efficiency in the advanced technologies. This Special Issue on “Advances in Laser Diodes and LEDs” is intended to open discussions on the frontier of research in the exciting light emitters. This issue is collecting the latest original research articles, in-depth and forward-looking review articles in the fields of semiconductor lasers, inorganic LEDs, organic LEDs as well as many other light emitting devices. Novel materials, device architectures, quantum and nanostructures, fabrication techniques, applications of the lasers, LEDs and OLEDs for wide spectral range including ultraviolet, visible, infrared and white are topics of interests for this Special Issue. Articles, comments, perspectives, reviews are all welcome and invited to convey the current state-of-the-art technical aspects for laser diodes and LEDs.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

Editor-in-Chief

Prof. Dr. Nelson Tansu

School of Electrical and Electronic Engineering (EEE), The University of Adelaide, Adelaide, SA 5005, Australia

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

CiteScore - Q2 (Instrumentation)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 14.9 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).
