## Silicon Nitride and Its Application

### Message from the Guest Editors

The properties of silicon nitride, such as its low propagation loss, high power handling, wide transparency window extended to the visible spectrum, and CMOS-compatibility make it an ideal platform for use in photonic integrated circuits (PICs) for certain applications such as LiDAR, sensing, bio-spectroscopy, communication, and of course quantum domain. There are different types of SiN technology, such as LPCVD and PECVD, each with distinct features and capabilities. This Special Issue aims to attract paper submissions on both technology development and from an application point of view. Globally, state-of-the-art research is taking place, where novel and highly strategic domains are being targeted, from nonlinear photonics for special laser integration (e.g., dual-comb and mode lock), to extremely low loss waveguides for scalable quantum chips, high power handling chips for free-space communication, optical beam forming for 5G, and LiDAR will be considered in this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Photonics* (ISSN 2304-6732). *Photonics* is an online open access journal covering both the fundamental and applications of optics and photonics. *Photonics* strives to provide an avenue to allow authors to disseminate their scientific findings—both theoretical/ simulations and experimental works—in highly accessible peer-reviewed journal publications. The manuscript in *Photonics* will be handled with quick turnaround production processing time. We welcome authors to submit their manuscripts for publications in *Photonics*. Our goal in *Photonics* is to enable fast dissemination of high impact works to the scientific community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, Ei Compendex, CAPlus / SciFinder, and other databases.

#### Journal Rank:

CiteScore - Q2 (Instrumentation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2025).
