

Special Issue

Biological Monitoring for Drinking Water Supply and Management

Message from the Guest Editors

This Special Issue will focus on advances in biological monitoring and how these can be fully embraced by water providers, managers and regulators. We seek submission of manuscripts reporting recent cutting-edge research on new forms of biological monitoring as well as significant advances in, or critical reviews of, existing approaches that have significant applied purpose within the water supply industry as well as for use by regulators and policy makers. The scope of these manuscripts should focus on phycological solutions to water quality issues, management of phycology-driven water quality risks from catchments through lakes, reservoirs and river systems, water treatment and distribution.

Guest Editors

Prof. Dr. Rupert Perkins

School of Earth and Environmental Sciences, Cardiff University, Cardiff, UK

Dr. Sophie Watson

School of Biosciences, Cardiff University, Cardiff, UK

Deadline for manuscript submissions

30 June 2026

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Peer Schenk

1. Sustainable Solutions Hub, Global Sustainable Solutions Pty Ltd., Brisbane, QLD 4105, Australia
2. Centre for Bioinnovation, The University of the Sunshine Coast, Sippy Downs, QLD 4556, Australia

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), Scopus, EBSCO, and other databases.

Journal Rank:

JCR - Q1 (Marine and Freshwater Biology) / CiteScore - Q1 (Agricultural and Biological Sciences (miscellaneous))
