

Special Issue

Feature Papers in Human Physiology–2nd Edition

Message from the Guest Editor

The first volume of this Special Issue was a great success; therefore, we invite you to publish your research in the second volume of this Special Issue (https://www.mdpi.com/journal/physiologia/special_issues/human_physiol). This Special Issue is designed to publish high-quality papers in *Physiologia*, a new journal dedicated to recent advances in the research area of physiology. The Special Issue engages in, but is not limited to, the following topics: musculoskeletal physiology, endocrine physiology, adipose physiology, and cardiovascular physiology (in health, aging, and/or disease). The Special Issue will present a collection of research articles and review articles highlighting interesting results in the field of human physiology.

About the Journal

Message from the Editor-in-Chief

Physiologia draws together researchers from all subdisciplines of physiological research with the common aim of enhancing knowledge of the mechanisms of growth, health, and disease across species. The journal aims to provide rapid peer review and unlimited open access to those interested in topics advancing physiological sciences from both the research and wider community. We hope you will support the journal by becoming one of our authors.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Physiology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 23.3 days after submission; acceptance to publication is undertaken in 3.6 days (median values for papers published in this journal in the second half of 2025).
