

Special Issue

Children's Sports Physiology

Message from the Guest Editors

Regular exercise plays a beneficial role in health-related components of physical fitness such as body composition, cardiorespiratory fitness, muscle endurance, strength, flexibility and cognitive development. This Special Issue aims to create a collection of articles on acute responses and chronic adaptations to children's sports practice. Articles on human systems that are not adequately addressed in the existing literature (e.g., cortical, digestive and immunity systems) are more than welcome. Submission of research articles, as well as reviews and case reports, will be considered for publication.

Guest Editors

Prof. Dr. Daniel Marinho

Prof. Dr. Vicente Javier Clemente-Suárez

Dr. Pantelis T. Nikolaidis

Deadline for manuscript submissions

closed (29 December 2023)

About the Journal

Message from the Editor-in-Chief

Physiologia draws together researchers from all subdisciplines of physiological research with the common aim of enhancing knowledge of the mechanisms of growth, health, and disease across species. The journal aims to provide rapid peer review and unlimited open access to those interested in topics advancing physiological sciences from both the research and wider community. We hope you will support the journal by becoming one of our authors.

Editor-in-Chief

Prof. Dr. Philip J. Atherton

School of Medicine, Royal Derby Hospital, University of Nottingham,
Nottingham, UK

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within ESCI (Web of Science), AGRIS, and other databases.

Journal Rank:

JCR - Q2 (Physiology) Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.5 days after submission; acceptance to publication is undertaken in 3.8 days (median values for papers published in this journal in the first half of 2025).
