Deadline for manuscript  
submissions:

**30 June 2024**

### Message from the Guest Editor

Dear Colleagues,

Whether or not they are mutually beneficial, plant–animal interactions are highly variable in their outcomes, depending on a variety or combination of abiotic and biotic factors. Depending on the biotic features of the associated species, a mutualistic interaction can be converted into a facilitative one, or even an exploitative one, such as parasitism. In this special volume, we intend to pay special attention to studies that explore how variation in environmental and biological aspects, which shape plant–animal systems, can directly influence the outcomes of these interactions.

Prof. Dr. Kleber Del-Claro

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
