submissions:

closed (31 March 2021)

Message from the Guest Editor

Dear Colleagues,

Global climate change and environmental pollution substantially restrict crop growth and development, which highlights the need to develop and research new crop species with increased tolerance to various abiotic stresses. In recent years, there is an increasing interest in clarifying the mechanisms of plant adaptation and tolerance against environmental stress.

The current Special Issue will also draw attention to medicinal plants (herbs) and the effects of drought, salt, light, temperature, and heavy metal stresses on their adaptation mechanisms and secondary metabolite production.

Scientists from all over the world are invited to submit original research and review articles on topics related to crop and medical plant tolerance to adverse environmental conditions.

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (*Plant Sciences*) / CiteScore - Q1 (*Plant Science*)
