## Plant Mating Systems and Genetic Markers

Guest Editor:

**Prof. Dr. Kermit Mark Ritland**

Department of Forest and  
Conservation Sciences, The  
University of British Columbia,  
2424 Main Mall, Vancouver, BC  
V6T 1Z4, Canada

Deadline for manuscript  
submissions:

**closed (30 April 2024)**

### Message from the Guest Editor

Dear Colleagues,

This Special Issue on plant mating systems will focus on methods for measuring plant mating systems and genes associated with plant mating systems. In particular, it will focus on recent developments in molecular techniques that facilitate more efficient and cost-effective research on mating patterns in large natural populations.

Prof. Dr. Kermit Mark Ritland

## Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
