Estonia

Deadline for manuscript
submissions:

30 December 2024

Message from the Guest Editors

History is the basis for our interpretation of humanity's past. Systematized historical sources allow us to see the practical changes that occurred over centuries of ethnobotany and analyze the causes of such changes. Studying history helps us to understand the influences on the evolution of local ecological knowledge regarding plant use. In ethnobotany, numerous understudied historical sources are awaiting modern interpretations. Old uses enhanced by the new possibilities offered by technology can enrich our everyday life. Yet, understanding historical sources, especially in ethnobotany, where several disciplines are involved, is not univocal. Mistakes introduced by misidentified plants or information misinterpreted from old languages can have negative, long-term consequences. This Issue aims to provide examples of the critical analysis of various historical sources, provide insights into ongoing historical and diachronic studies on plant use, and introduce the best practice guidelines for interpreting such data. This Issue welcomes articles on all aspects of historical ethnobotany within all potential use categories.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
