Special Issue

Cucumber Genetics Metabolism and Production

Message from the Guest Editors

This Special Issue publishes research papers on the genetics, metabolism and production involved in the responses of cucumber to their environment. The areas covered by the Special Issue include the following: (1) responses of cucumber to abiotic stress. (2) Quality genetics and molecular biology of cucumber. (3) Growth and development genetics and molecular biology of cucumber. (4) The main problems faced by cucumber in production, such as continuous cropping obstacles.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
