

Special Issue

Abiotic Stress Responses in Plants

Message from the Guest Editors

Abiotic stress is a significant concern due to its effects on plant survival and productivity; it is responsible for significant losses in crop production worldwide. Therefore, more research is needed to understand the mechanisms different plant species exploit in response to abiotic stress on molecular, cellular, tissue, anatomical, morphological, and physiological levels. This Special Issue of *Plants* proposes to collect as much information as possible on the responses of plants to abiotic stress and to propose novel solutions to increase the adaptability of the plants to the stress perceived.

Guest Editors

Dr. Marilena Ronzan

Bioinspired Soft Robotics Laboratory, Istituto Italiano di Tecnologia, Via Morego 30, 16163 Genova, Italy

Dr. Marzena Sujkowska-Rybkowska

Department of Botany, Institute of Biology, Warsaw University of Life Sciences SGGW, 02-787 Warsaw, Poland

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
