

Special Issue

Special Edition of Plant Chromatin Biology

Message from the Guest Editors

The Special Edition “Plant Chromatin Biology” will focus on the molecular players that operate within the chromatin structure and composition and how they can be regulated in response to environmental cues or developmental transitions. With their strong plasticity, plants offer great opportunities to decipher the mechanisms that operate within chromatin and to understand how the chromatin structure and the epigenetic information ensure the fine tuning of the genome expression program in various conditions. We invite submission of works that investigate these mechanisms by various and combined approaches, such as biochemistry, genetics and omics approaches, as well as review articles that offer a comprehensive view of the current knowledge and its limits or method papers with new techniques to analyze these mechanisms.

Guest Editors

Dr. Céline Duc

Faculté des Sciences et Techniques, Nantes Université, CNRS, US2B, UMR 6286, 44000 Nantes, France

Prof. Dr. Hank W. Bass

Department of Biological Science, Florida State University, Tallahassee, FL, USA

Deadline for manuscript submissions

closed (20 August 2023)

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
