

Special Issue

Impact of Biostimulants on Plant Growth and Nutrient Uptake

Message from the Guest Editor

This Special Issue seeks to explore new research findings about how biostimulants can enhance nutrient uptake, leading to healthier crop growth and reducing dependence on chemical inputs. This Special Issue will address several areas, such as biostimulant-assisted mineral absorption, their contribution to plant–microbe interactions in the rhizosphere, and wider implications for sustainable agriculture. Researchers are invited to submit original manuscripts that contribute to a deeper understanding of the potential of biostimulants to address the pressing challenges of modern agriculture, ensuring food security while protecting the environment.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
