

Special Issue

Plant Therapeutics 2.0

Message from the Guest Editors

Plants contain many principles, some of which are beneficial for human health. However, despite the best efforts of plant experts, many unclear points surround this field of research, particularly around ethanoherbs and/or classical plants, which are widely used around the world. Therefore, this Special Issue will focus on these gaps in knowledge. Additionally, combinations of plants with each other and/or with modern medicine are also popularly used in therapeutics. It is incredibly important to assess the historical significance of products contained in plants, so we would like to invite you to share useful plants that are applied in your local market, using a reliable model of disorders to indicate their effectiveness in therapeutics. Moreover, considering the strong interest in plant-derived effectiveness in health as an emerging challenge for modern therapies, this Special Issue will cover a wide variety of areas, aiming to contribute to the overall knowledge of medicinal plants from several perspectives. Scientific papers, including reviews, commentaries, original research, and others, are all welcome from everywhere around the world.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
