

Special Issue

Studies on Plant–Humans Interactions as a Means for Fostering a More Sustainable Future

Message from the Guest Editors

Investigations of the interactions between plants species and human societies are quintessential for the sustainable use of biodiversity and in fostering environmental educational platforms aimed at decreasing plant blindness, as well as further helping local communities cope with food security, sound rural development, biocultural heritage, and nature tourism, or to propose new plant foods, new herbal remedies, and, in general, new durable materials of plant origin. This Special Issue aims to include original and pathbreaking contributions that explore this interface in areas from ethnobotany to applied botany, economic botany to the botanical humanities, and the intersection between botany and art.

Guest Editors

Prof. Dr. Andrea Pieroni

Ethnobotany and Ethnobiology, University of Gastronomic Sciences,
Piazza Vittorio Emanuele II 9, Pollenzo, I-12042 Cuneo, Italy

Dr. Renata Söukand

Department of Environmental Sciences, Informatics and Statistics, Ca' Foscari University of Venice, Via Torino 155, Mestre, 30172 Venice, Italy

Deadline for manuscript submissions

31 October 2025

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
