

Special Issue

Plant Metabolic Engineering

Message from the Guest Editor

This special issue includes, but is not limited to, contributions from speakers at the 2023 Gordon Research Conference on *Plant Metabolic Engineering – Sustainability through Innovation*. It will highlight how innovations in plant metabolic engineering, metabolism, and biotechnology underpin the transition to a sustainable and circular bioeconomy and presents real world examples where plant metabolic engineering is leading to greater productivity of food, biomass or secondary products.

Guest Editor

Prof. Dr. Katrina Cornish

Food, Agricultural and Biological Engineering, Ohio Agricultural Research and Development Center, The Ohio State University, Wooster, OH, USA

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
