

## Special Issue

# Advances in Jujube Research, Second Edition

### Message from the Guest Editors

This Special Issue, entitled “Advances in Jujube Research, Second Edition”, is dedicated to research on the biology, genetics and breeding, ecology, post-harvest treatment, and nutritional status of jujube, but will also cover other aspects of the life of these plants. Jujube (*Ziziphus*) is an outstanding multipurpose economic plant with great potential in drought-prone and marginal districts. Chinese jujube (*Z. jujuba* Mill.) and Indian jujube or ber (*Z. mauritiana* Lam.) are the two main economically valuable species. The commercial and experimental cultivation of jujube takes place mostly in China, Pakistan, India, Iran, Korea, Japan, Australia, the USA, Italy, Romania, and Israel. However, jujube is still a relatively unknown and underutilized horticultural plant. This Special Issue aims to gather current knowledge on various aspects of jujube research. We invite researchers to submit review articles, full-length original papers, communications, short overviews, or comments that cover various aspects of jujube’s biology, genetics and breeding, ecology and post-harvest treatment, nutrition, and so on.

### Guest Editors

Dr. Shengrui Yao

Department of Plant and Environmental Sciences, College of Agricultural, Consumer, and Environmental Sciences, New Mexico State University, Las Cruces, NM 88003, USA

Dr. Zhihui Zhao

Chinese Jujube Research Center, College of Horticulture, Hebei Agricultural University, Baoding 071001, China

### Deadline for manuscript submissions

30 November 2026

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
