Biodiversity Management and Conservation: Exploring the Dynamics of Alien and Native Plant Species

Message from the Guest Editors

This Special Issue invites the exploration of the intricate tapestry of biodiversity, focusing on the interaction between alien and native species. Between unending novelties and challenges, this new Special Issue delves into dynamic relationships, shedding light on the ecological, evolutionary, and phytosociological implications of these interactions. By analyzing both positive contributions and potential critical issues, this Special Issue aims to deepen our understanding of how these species shape and challenge existing ecosystems.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
