

## Special Issue

# Plant Viruses, Viroids and Phytoplasmas: Insight into Evolutionary, Pathogenicity, and Epidemiology Studies—2nd Edition

### Message from the Guest Editors

This Special Issue of *Plants* will highlight the identification and molecular characterization of plant viruses, viroids, and phytoplasmas, with particular attention given to their genome organization, molecular variability, and taxonomic features. Therefore, this Special Issue welcomes the submission of articles (including original research papers, abstracts, and reviews) that focus on the evolutionary, pathogenicity, and epidemiology investigations of the pathogens mentioned above.

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
