Chemistry of Plant Natural Products

Message from the Guest Editor

Since ancient times, natural products, especially plants, have been consumed empirically, as food and as cosmetics and medicines, due to their efficacy owing to their secondary metabolites. Through numerous previous studies, the efficacy of these natural products has been revealed according to their major components, and various medicines such as paclitaxel, aspirin, artemisin, and oseltamivir have been developed. Since new diseases such as monkeypox and SARS-CoV-2 continue to appear, the demand for these drugs will continue to increase. Therefore, this Special Issue of *Plants* will focus on the structural elucidation of active components from natural products to treat diseases.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
