# Management and Biodiversity Conservation of Southern and Sub-Antarctic Forests

### Message from the Guest Editors

The southern and sub-Antarctic forests of Patagonia, South Africa and Oceania present a high degree of biodiversity and endemism, representing an ecosystem and landscape of great value. Due to its distance from the largest production centers and the presence of forest species little known by international markets, these forests present a good degree of conservation. Although in absolute terms, human impact is generally low compared to other parts of the world, some of these ecosystems have been subject to substantial disturbance, for example, due to the historical overexploitation of forest resources and their conversion to animal husbandry. However, few studies have been carried out in the disciplines of management and biodiversity conservation. The term 'conservation' is considered to encompass all efforts affecting the preservation and protection of the natural environment and its resources, including measures to ensure the sustainable use of resources. The term 'management' includes any type of measure or intervention that is designed to achieve conservation, or to regulate resource use and other

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
