

## Special Issue

# Sustainable Disease Management in Tropical Crops

### Message from the Guest Editors

Tropical crops are often grown for an entire year in commercial plantations. In association with high temperature and humidity conditions, this may provide a conducive environment for plant pathogens to quickly develop. As a result, disease control plays a pivotal role in mitigating crop losses. The sustainable management of plant diseases involves efficient, long-lasting, and environmentally friendly control strategies and tactics, preserving the soil health and agricultural biodiversity. Sustainable disease management includes genetic resistance of host plants, biological control, rational use of chemicals, and adoption of agricultural practices (e.g., crop rotation) that minimize potential negative impacts on human health and the environment. The development of economically viable, accessible technologies is crucial to promoting the adoption, by the farmers, of sustainable agricultural practices. Therefore, the main objective is to balance the necessity to increase agriculture production with socioenvironmental responsibility, ensuring tropical crops are cultivated in a healthy and durable manner.

### Guest Editors

Prof. Dr. Marcelo Vivas

Dr. Roberto Ramos-Sobrinho

Dr. Janieli Maganha Silva Vivas

### Deadline for manuscript submissions

30 December 2025

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
