

Special Issue

Agrobiodiversity and Plant Genetic Resources for Sustainable Agriculture and Healthy Food Systems

Message from the Guest Editors

This Special Issue in *Plants* will highlight relevant research papers, as well as methodological and review articles that are focused on the following:

- The identification and evaluation of the best strategies and tools for the conservation, management, valorization, and utilization of plant genetic resources for food and agriculture, including citizen science and participatory approaches.
- The assessment of agrobiodiversity and the genetic diversity of PGR for their potential value in agriculture and for sustainable and healthy food systems using any available and appropriate approaches that exploit various disciplines, including (but not limited to) genetics, population genetics, plant breeding, agroecology, ecology, nutrition, and various omics approaches.
- Additionally, considering the previously mentioned aspects, works aimed at addressing normative and legal issues related to plant property rights will be also most welcome.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
