Ethnobotanical Study of Medicinal Plants

Message from the Guest Editor

Ethnobotany and ethnomedicine are crucial in restoring traditional knowledge, preserving biodiversity, and discovering new medicines. By adding value to traditional knowledge, cultural diversity, and heritage, its role is increasingly appreciated. Research in these areas contributes to sustainable development and conservation strategies because understanding how communities interact with their environment leads to more effective conservation plans that respect local customs and lifestyles. In addition, ethnomedicine offers insights into traditional healing practices, potentially leading to the discovery of new medicines and the conservation of indigenous and local cultures. These disciplines are vital to ensure that valuable traditional knowledge is documented, preserved, and passed on to future generations. In this Special Issue, original research papers, perspectives, hypotheses, opinions, reviews, modeling approaches, and methods that focus on ethnobotany knowledge of medicinal plants and its potential benefits in human and animal health are most welcome.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
