Seaweed Biology: Focusing on Food, Materials and Bioenergy

Message from the Guest Editors

Over recent decades, enormous progress has been made in the knowledge and use of seaweeds as food, fertilizer, sustainable materials, and energy sources, which should certainly be part of the strategies that humankind should consider in these areas. Seaweed, by reducing cattle methane, replacing fossil plastic, and storing enormous amount of carbon, shows huge potential in the pursuit of global food security and fighting climate change. Innovative seaweed cultivation techniques, micro-propagation and breeding tools, biomass processing optimizations coupled with robotic, advanced sensing, and monitoring techniques are delivering improved productivity and can better ensure the sustainable development of the seaweed farming and processing industry. In this Special Issue *Seaweed Biology: Focusing on Food, Materials and Bioenergy*, papers will be accepted from a broad scope of interdisciplinary research on seaweed biology, cultivation, seaweeds for food, sustainable material, and energy viewpoints, from basic molecular biology to industrial application. Original research papers, methods, reviews, and perspectives are welcomed for submission.

Guest Editors

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
