

## Special Issue

# Antioxidant Activity of Plant Extracts

### Message from the Guest Editors

Antioxidants are specific compounds that protect the cells against the damaging effects of free radicals. In terms of health properties, many studies have demonstrated their various biological activities including anti-inflammatory, anticancer, antibacterial, and antiviral properties. Specific bioactive compounds from plants were described to function as antioxidants, enzyme inhibitors, epigenetic modulators, or even suppressors in some signaling pathways.

### Guest Editors

Prof. Dr. Andreea Stănilă  
Prof. Dr. Carmen Socaciu  
Dr. Zorita Diaconeasa

### Deadline for manuscript submissions

closed (30 June 2023)

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
