

## Special Issue

# Calcium Signaling in Plant Biotic Interactions and Defense

### Message from the Guest Editors

This Special Issue aims to provide a unique compendium that highlights these new developments in our understanding of how this critical messenger molecule contributes to plant function, growth, and response to the environment. Contributions are welcomed from scientists working at all system levels, including molecule, cell, organism and environment/ecological perspectives. Studies addressing any of the above aspects of plant cell Ca<sup>2+</sup> signaling would be appropriate contributions.

---

### Guest Editors

Prof. Dr. Gerald A. Berkowitz

Dr. Mang Ma

Dr. Alice Kira Zelman

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
