

Special Issue

Studies on *Cannabis sativa* and Cannabinoids

Message from the Guest Editor

In recent years, the worldwide hype of cannabis and cannabis-related products is observable. This hype entailed broad related research on the topic. Today, different varieties are sequenced and transcriptomic data are available. Together with metabolic studies, the biosynthetic routes and the genetics get more and more understood. What is still missing are well designed studies to elucidate the medicinal impact of single cannabinoids. To ensure a success of cannabis in medicine, more information is needed. There are some reasons one could be worried, such as the ideas to have cannabinoid and especially THC-containing soft drinks or alcoholic drinks. This will lead to a discussion regarding the legalization of cannabis. The effect of cannabinoids after oral consumption, especially in combination with alcohol, will lead to overdoses, not to mention the risks of consuming cannabinoids. It is of importance that scientists exploit the potential of cannabis for human health. In this context, the aim of this Special Issue is to bring together new trends, developments, and especially research papers, in order to get closer to the goal of using cannabis for the benefit of human health.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
