

Special Issue

Abiotic and Biotic Stress of the Crops and Horticultural Plants

Message from the Guest Editor

Crop plants and horticultural crops are constantly exposed to various stresses, such as drought, salinity, extreme temperatures, diseases, pests. These stresses can impact crop yield and quality, resulting in significant economic losses and food security challenges.

Therefore, it is crucial to explore effective strategies for mitigating the adverse impacts of these stresses on crop production. For this Special Issue, we invite original research articles and review studies focusing on innovative approaches, new insights, and practical solutions related to stress management in crops and horticultural plants. Submissions may cover a wide range of topics including stress tolerance mechanisms, genetic and molecular approaches for breeding strategies, physiological responses at the biochemical level integrated pest and disease management techniques precision farming technologies sustainable practices. We encourage contributors from diverse disciplines including agronomy plant breeding pathology entomology genetics molecular biology environmental science to join us in addressing the challenges associated with abiotic and biotic stress in crops and horticultural plants.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
