

# Special Issue

## Tea Plants Cultivation

### Message from the Guest Editors

**Tea plant cultivation** is a comprehensive technical science, which provides a vital guarantee for improving tea yield and quality, reducing production costs, improving labor efficiency and economic benefits. Furthermore, we should pay more attention to the interaction between tea planting and the environment. Only in this way can we promote the green and sustainable development of the tea industry. Therefore, multi-discipline studies are essential for tea cultivation research. Much remains to be discovered, including information on tea plant–environmental interactions, targeted cultivation of healthy soil in tea gardens, green and low-carbon cultivation modes, anti-stress and disaster reduction technology and intelligent equipment in tea gardens and so on. This Special Issue of *Plants* will highlight the **tea plant–environmental interactions, soil health, emission reduction, and digitization in tea gardens**. We will provide **special discount** for all the manuscripts for this special issue. If you have any plans, please let us know. You could write to us via email or contact the assistant editor at [juicy.yang@mdpi.com](mailto:juicy.yang@mdpi.com)

### Guest Editors

Prof. Dr. Li Ruan

Prof. Dr. Wanping Fang

Dr. Guixiang Zhou

Dr. Yu Duan

### Deadline for manuscript submissions

closed (30 April 2024)

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
