

Special Issue

Orchid Conservation and Biodiversity—2nd Edition

Message from the Guest Editors

This Special Issue of *Plants*, titled “Orchid Conservation and Biodiversity—2nd Edition”, aims to provide new insights into orchid diversity, evolution, distribution patterns, habitat and ecological preferences, extinction rates and speciation drivers across the world. Research papers on systematics, reproductive biology, ecology, evolution and biogeography, as well as orchid spatial distribution and diversification across ecological and biogeographical gradients connected with their conservation and biodiversity are welcome. **Keywords**

- orchid
- conservation
- biodiversity
- distribution patterns
- speciation
- ecology
- biogeography
- evolution
- reproductive biology
- extinction

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, and conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
