

## Special Issue

# Advances in Genetics and Breeding of Rapeseed (*Brassica napus* L.)

### Message from the Guest Editors

Rapeseed (*Brassica napus* L.) is the world's third-largest oil crop. Both the oil content and quality of rapeseed have been markedly improved in recent decades, particularly since the release of its reference genome. To maximize the values of rapeseed, a multi-purpose development strategy centered around genetic improvement and breeding, integrating the utilization of oil, flower, vegetable, honey, feed and fertilizer, is becoming increasingly acceptable and extremely important. Therefore, this Special Issue aims to synthesize the latest research progress on rapeseed genetics and breeding related to the aforementioned topics covering the identification and characterization of genes/QTLs and novel/superior alleles by functional genomics, genetics, resequencing and breeding, in order to augment rapeseed oil content, oil quality, yield potential, nutritional values and biotic/abiotic stress resilience. Original research papers, reviews, resources, technologies and perspectives are welcome.

### Guest Editors

Prof. Dr. Hanzhong Wang

Chinese Academy of Agricultural Sciences, Beijing, China

Dr. Wei Hua

Key Laboratory of Biology and Genetic Improvement of Oil Crops, Oil Crops Research Institute of the Chinese Academy of Agricultural Sciences, Ministry of Agriculture, Wuhan 430062, China

### Deadline for manuscript submissions

closed (20 March 2023)

## About the Journal

### Message from the Editor-in-Chief

*Plants* is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
