Special Issue

Rice Genetics and Breeding 2023

Message from the Guest Editors

To scientists around the world who study rice, breeding continues to increase productivity despite global climate change and labor shortages in agriculture, enriching our energy and lives in the process. Therefore, we would like to communicate the core science and technology of rice breeding in relation to rice genes in this Special Issue. It is our hope that we can go one step further and contribute to increasing food production on the planet.
Prof. Dr. Kyung–Min Kim

Guest Editors

Prof. Dr. Kyung-Min Kim

Department of Applied Biosciences, Kyungpook National University, Daegu 41566, Republic of Korea

Dr. Gang-Seob Lee

Biosafety Division, National Academy of Agricultural Science, Rural Development Administration, Jeonju 54874, Republic of Korea

Deadline for manuscript submissions

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB R3T 2N2, Canada

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
