Hormonal Interactions in the Regulation of Plant Development

Message from the Guest Editors

Plant hormones are essential elements for adequate growth and development, as well as environmental adjustments for plant resilience. However, it is becoming essential to understand not only their individual role but also their interconnections, the so-called hormone crosstalk. Current research moves toward a general view of developmental processes, in which certain hormone biosyntheses, metabolisms, signaling, and responses are always under each other's influence. Therefore, exploring the underlying hormonal networks of growth and development could assist in designing and redefining physiological markers, which can contribute to the food and agriculture industries by moving from model to crop and forestry species. This Special Issue of *Plants* will highlight how hormone crosstalk is essential for proper regulation through time and space of plant development, including the required adjustment to environmental fluctuations.

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando
Department of Plant Science, University of Manitoba, Winnipeg, MB
R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
