Special Issue

Technologies, Applications and Innovations in Plant Genetics Research

Message from the Guest Editors

Advancements in plant genetics research are driven by cutting-edge technologies, innovative applications, and transformative methodologies. From next-generation sequencing and CRISPR-based genome editing to precision phenotyping and learning machine-driven analysis, these innovations have accelerated genetic discoveries and their translation into practical applications. Emerging technologies in computational biology, synthetic biology, and high-throughput screening are further revolutionizing plant genetics, enabling improved crop resilience, productivity, and adaptation to environmental challenges. This Special Issue highlights the latest technologies, applications, and innovations shaping the future of plant genetics research, with a focus on their impact on agriculture and sustainability.

Guest Editors

Dr. Cristina Barrero Sicilia

About the Journal

Message from the Editor-in-Chief

Plants is an open access journal which provides an advanced forum for research findings in areas related to plant function, its physiology, biology, taxonomy, stresses, and its interactions with other organisms. It publishes original research articles, reviews, reports, conference proceedings (peer reviewed full articles) and communications. In original research papers, it is important that full experimental details are provided. We also encourage timely reviews and commentaries on topics of interest to the plant research community.

Editor-in-Chief

Prof. Dr. Dilantha Fernando

Department of Plant Science, University of Manitoba, Winnipeg, MB R3T 2N2, Canada

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, PubAg, AGRIS, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Plant Sciences) / CiteScore - Q1 (Ecology, Evolution, Behavior and Systematics)
